

GWP Consultants LLP is an independent consultancy partnership working in sustainable water and earth resources management in the UK and overseas and has the following position vacant.

HYDROLOGIST/WATER RESOURCES ENGINEER

A hydrologist-water resources engineer is required to support our expanding team of water professionals. Duties will include flood hydrology and catchment analysis, design of surface water management and flood protection structures, and water supply/disposal infrastructure engineering.

You will have (or be working towards) an MSc in water resources technology, river management, hydrology, or similar qualification. Previous work experience is desirable but not essential.

Candidates will be self-motivated, able to work well both within a multi-disciplinary team and independently, and available to work in UK and overseas.

Candidates must be eligible to work and reside in the UK.

Further information about GWP and the range of work that we do can be found at www.gwp.uk.com, or call us on 01608 810374.

No agencies please.

GWP offers a competitive salary and a staff benefits package including private medical, a workplace pension scheme and 25 days annual leave plus 8 bank/public holidays.
